2. driver lenovo ideapad 320
3. driver lenovo g40-45

♦ Posting a problem and a reply is helpful and it answers your question, please mark it as an ' Accept As Solution' ♦ I'm not a Lenovo employee, just a volunteer geek who likes to help folks.. *** Edit *** After installing some new drivers, I have come down to two devices as shown below: my cd drive still isn't reading discs, and is making a bit of a stange noise, but not loud, do I still have missing drivers that I need to install or is it likely the drive is physically damaged? What Lenovo model you have?Example: Ideapad z510 For the unknown device have you installed any available Power Management drivers? For the Atom Processor, try reinstalling the Chipset driver.. As for the optical drive, Device Manager isn't showing any problem with it If the drive is noisy it most likely needs to be replaced.. I tried to update the drivers, but Windows couldn't find any I don't know what to do, please help.

0-CRW driver search and got: Windows could not find driver software for your device, Although per the above comment Windows apparently found something to download.. Also check the available downloads for your model to see if there isn't anything related to the processor. cea114251b [Ioana parvulescu intoarcere in bucurestiul interbelic pdf](#)
